

## Technical Support Bulletin: Extending an Arc to Intersect With Wall

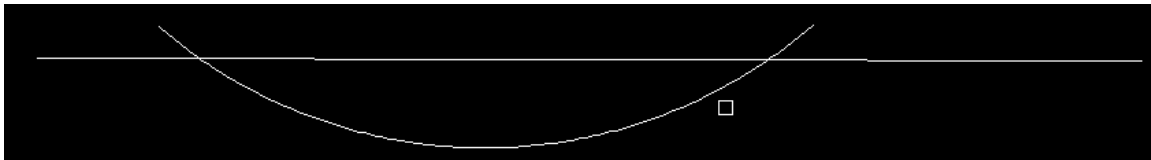

Technical Support Bulletin (Last update 11-20-6)

Abstract: If you want to extend an arc to intersection with wall you can use these AllenCAD command.

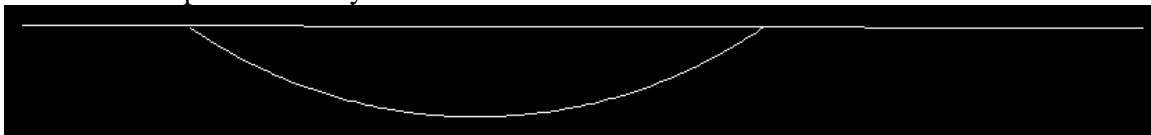

Assume you start with:

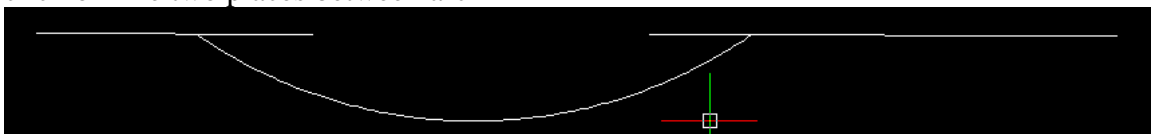

Use lengthen tool  on modify toolbar  
Select end of arc and move mouse to extend arc beyond end of line. Repeat for other end of arc

Use trim tool  on modify toolbar  
Select wall as trimming edge  
Select arc endpoint as entity to trim

select modify -> break  
click on line two places between arc

use trim again

select arc as cutting edge and end points of broken segment as entity to trim
